1 INTRODUCTION

Congratulations on your purchase of SmartReports+! This Hi-Speed system is your friendly, secure, and comprehensive reporting system for your existing QB Business Management system. You can view, print and export (to multiple formats) Sales, Inventory, Job Costing and Financial reports using Smart Reports (including graphs for those who are visually minded) while continuing to work on your existing accounting system.

Once installed and configured for your accounting system, you can have unlimited use of SmartReports+. You can extract reports based on transaction dates, financial years and also compare yourselves against industry benchmarks if you have access to such figures.

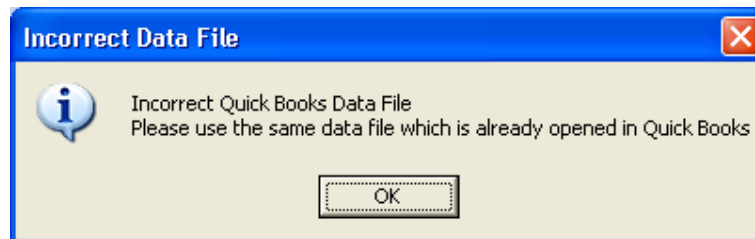

Use the following sections to generate your own Smart Reports.

1.1 SMART REPORTS+ MAIN SCREEN

Smart Reports can be accessed via Start→Programs→SmartReports+→SmartReports.

When launched for the first time, the user will be asked enter their Company and Contact details. It is important that these are completed properly as the information is required for support and maintenance purposes.

On launching Smart Reports from your desktop or from the Startup Group, the Smart Reports application will be loaded and the following screen is displayed which prompts for the correct data file to be configured and that should be same as data file already opened in Quick Books. For this you need to open your Quick Books business application software and configure your current QB data file in Quick Books as well as Smart Reports +. You can configure this data file through “Tools->Change Data file” option also after launching the Smart Reports + application or during the initial launch or when you get the following when wrong data file is configured. After clicking on “Ok” button in the following screen one more screen will be shown where you can specify your QB data file path location. Please make sure that you have already configured the same datafile in Quick Books application as well.

SmartReports
Smarter Data. Faster Profits.

SmartReports+ Version: 6.0

Our SmartReports+ for MYOB and Quickbooks are designed to give you and your office staff accurate and insightful business information to help you make informed business decisions and improve your profits.

Smart Reports will be pleased to assist in customising the reports to your business or procure new reports. Please contact us on +61-7-33763415 or fax your requirements to +61-7-30203848 or via email info@smartreports.com.au or the web site <http://smartreports.com.au>

Click Launch to start using the reports...

We provide the SmartReports+ application "AS IS" without warranty of any kind, either express or implied, including, but not limited to, the implied warranties of fitness for a particular purpose or merchantability and provision of or failure to provide support services.

Smart Reports shall not be liable for any indirect, consequential, special or exemplary damages such as but not limited to loss of revenue, data or anticipated profits, lost business, or other economic loss or loss of goodwill from the use or inability to use the SmartReports+ for any purpose. Smart Reports does not warrant the performance, accuracy or freedom from error, or any results generated through use of the SmartReports+ application. You assume the entire risk as to the results and performance of the SmartReports+ application and Smart Reports does not warrant that the SmartReports+ application will operate without interruption or error.

Performance of the SmartReports+ application may be different in a networked environment when compared to a stand alone environment

1.2 USING SMART REPORTS FOR THE FIRST TIME

Once the SmartReports+ application has been installed, the user must setup the application to use the correct parameters for the Financial Reports. These are in relation to General Ledger accounts that relate to the following accounts:

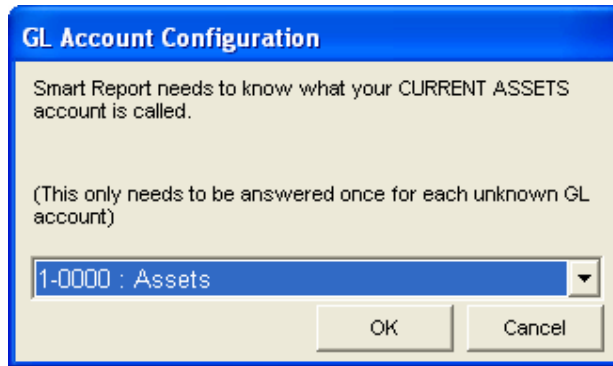

- Current Assets
- Total Assets
- Inventory
- Current Liabilities
- Income

SmartReports+ User Guide

Smart Reports Pty Ltd - SmartReports+ User Guide

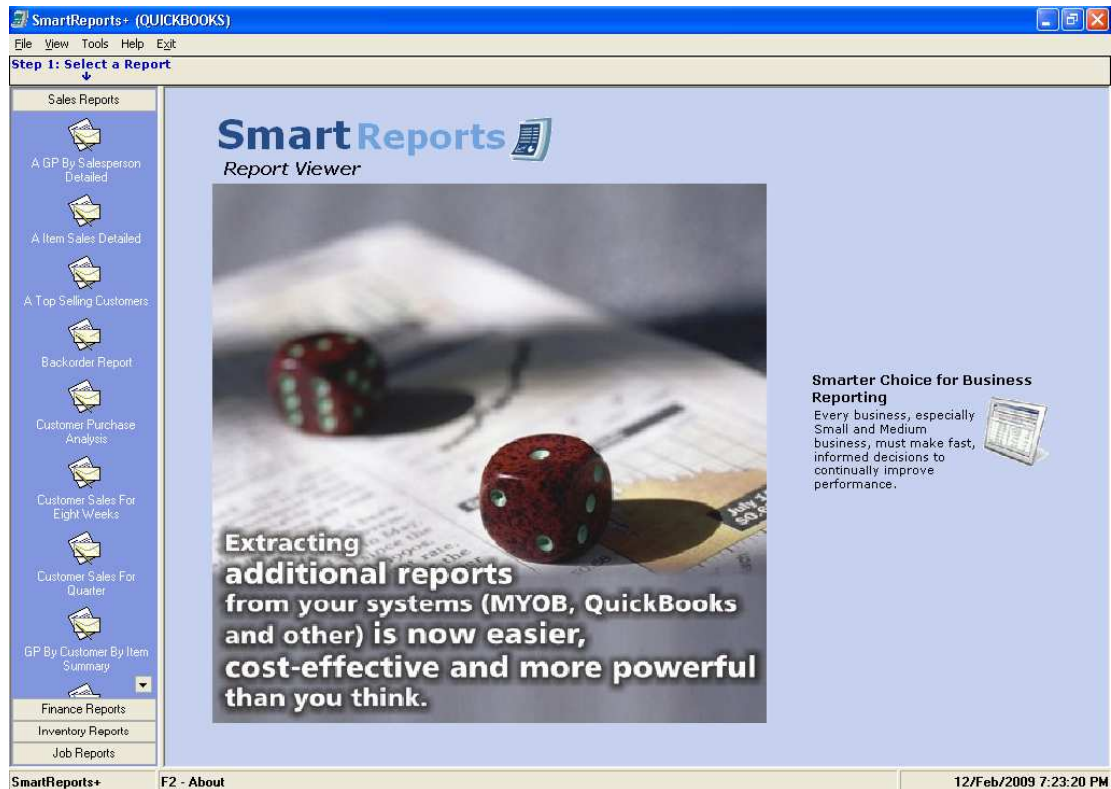

Reference -6/3/06-V6.0

SmartReports+, when launched for the first time, will ask for specific accounts in your General Ledger that refer to the accounts if they are not called the same. For example, some businesses may call 'Inventory' as 'Stocks' or 'Products'. Please specify the relevant General Ledger account descriptions that refer to the above. This setup may be modified at any time by selecting 'Map GL Accounts' from the 'Tools' menu. The following screen will be displayed. The user can select the appropriate mappings based on their requirements.

2 REPORTS MENU SCREEN

The following is the main screen displayed upon launching the Smart Reports application.

2.1 CREATING YOUR FIRST REPORT

To create a report, use the prompts as specified in the screen above.

1. Step 1 – Click on the report required
2. Step 2 – Enter the fields listed under ‘Select Parameters’
3. Step 3 – View, Print or Cancel the report

Congratulations! You have now created your first Smart Report. The methods are similar for extracting reports from other areas. The following sections describe the reports in further detail.

Help	
About	Show application information including Smart Reports Pty Ltd contact details.
Exit	Close the application.

5 REGISTRATION

To register SmartReports+ to be used for your company data, simply click the **Register** option from the Tools menu on the SmartReports+ main screen and follow the prompts as shown below.

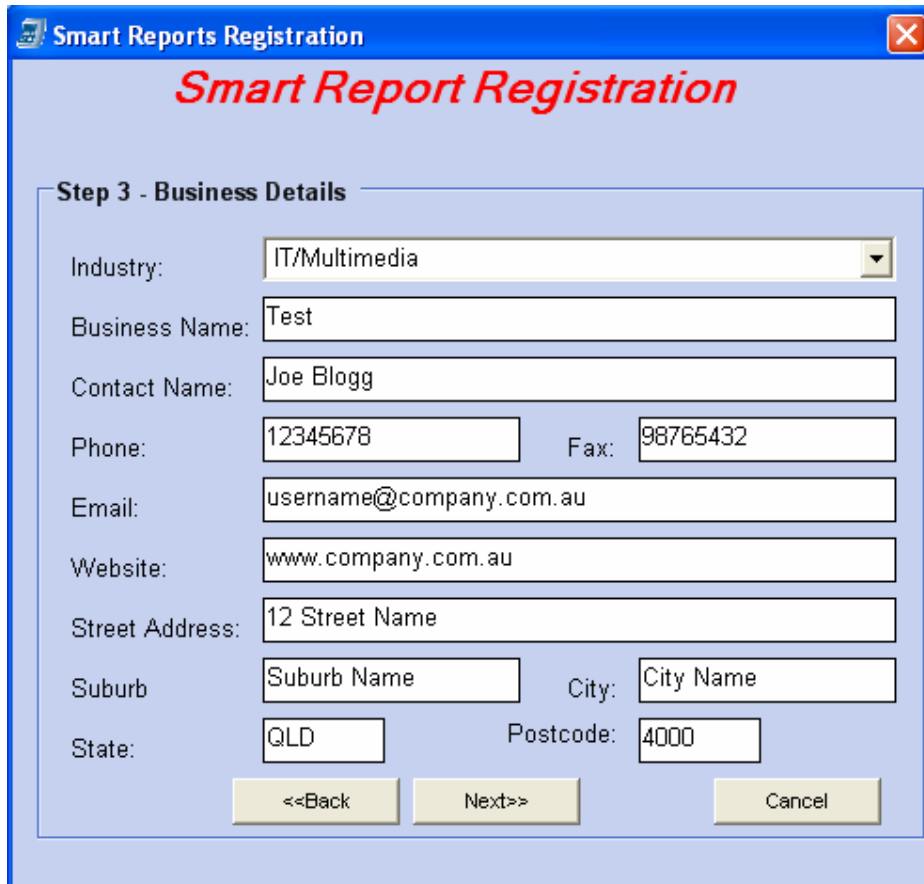

To Register Smart Report for your company data, click the Next>> button. You will be presented with the following screen.

If you have live Internet connection, then select the first option, otherwise select the second option to manually register.

If the second option is selected, the following screen is displayed.

Smart Reports Registration

Smart Report Registration

Step 3 - Business Details

Industry:

Business Name:

Contact Name:

Phone: Fax:

Email:

Website:

Street Address:

Suburb: City:

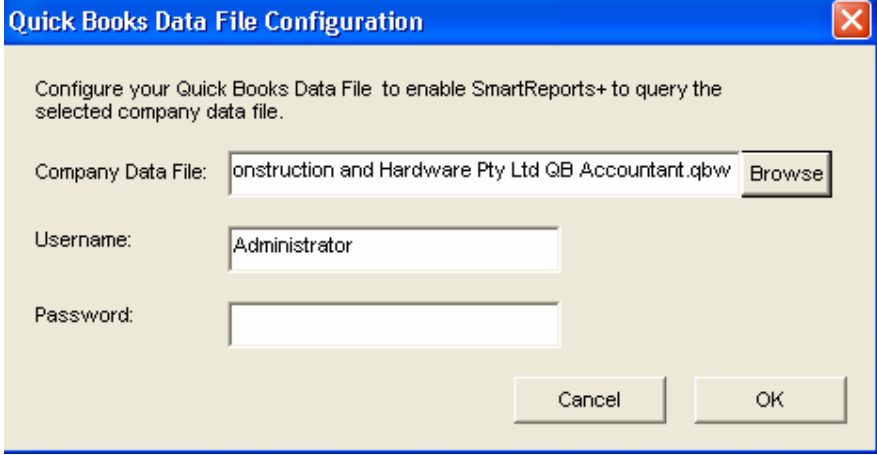

State: Postcode:

Any details shown on the screen can be updated and the Next>> button must be clicked to continue with the registration process. To go back one screen, click the <<Back button.

On clicking the Next button, a Registration form is displayed. Print this form using the Print icon shown and fax it to Smart Reports at 07 30203848. Once the registration details have been processed, Smart Reports will send you the registration key and necessary instructions to utilise SmartReports+ for your company data.

6 SETUP: CHANGING THE QB DATAFILE

To setup the QB data file that the SmartReports+ application is linked to, select 'Change Data file' from the 'Tools' menu. Complete the fields below and select 'OK'. Restart the Smart Report application to allow the link to be changed.

The screenshot shows a dialog box titled "Quick Books Data File Configuration" with a close button (X) in the top right corner. The dialog contains the following text and fields:

Configure your Quick Books Data File to enable SmartReports+ to query the selected company data file.

Company Data File:

Username:

Password:

At the bottom of the dialog are two buttons: and .

7 UNINSTALLING SMARTREPORTS+

To uninstall SmartReports+, select Programs->SmartReports+>Uninstall SmartReports+. Follow the prompts on the screen to uninstall the application.
